THE PETROLEUM MARKET.

NEW YORK, July 1.

The petroleum speculation is still disturbed by the "search" reports of good wells opened in the Wardwell's Ferry district, and there has been a considerable amount of selling on the expected effect on the market of these developments. It is probable, however, that the production of the new wells will be found to be smaller than that given by the first reports. The district is considered by well-informed operators to be only a "pocket pool." Nevertheless, the effect of the news was seen to-day in a decline from 50 1/2c to 57c cents soon after the opening, and 60c cents, 60 1/2c cents, and 61c cents followed. The price was again touched, but it was succeeded by a gradual improvement up to 59 1/2c and 59 1/2c cents. Carrying rates were again flat and the market ended firmly. The range of prices and the total dealings for the week were as follows:
